WORK EXPERIENCE

Front-end Developer Techelogy

02/2025 - Present lucknow, uttar pradesh

Working as a Full Stack Developer, contributing to both frontend and backend development using technologies like React.js, Laravel, Rust, and Flutter. Experienced in building user-friendly interfaces and scalable solutions while leveraging AI-driven tools to quickly adapt and deliver efficient results.

Achievements/Tasks

- Built and delivered scalable features across frontend and backend
- Quickly adapted to new technologies like Laravel, Rust, and Flutter
- Worked with monorepo architecture to manage scalable codebases

Front-end Developer RedDot Innovation

02/2023 - 11/2024 singapore

Worked as a React JS Developer at Reddotinnovative, where I contribute to the development of innovative web applications using React.js, angularjs, ant library, etc. Responsible for designing and implementing user interfaces, optimizing application performance, and ensuring code quality through testing and debugging.

Achievements/Tasks

- Developing dashboards UI
- API Integrations
- Error Handlings
- Create Point of sale related logics

Frontend developer Rpa Technologies

01/2022 - 05/2022 bhopal, madhya pradesh

Achievements/Tasks

- Developing and maintaining the user interface.
- Implementing design on mobile websites.
- Fixing bugs and testing for usability.
- API integration

Frontend developer A2D Technosoft

02/2021 - 12/2021 japalpur, madhya pradesh

Achievements/Tasks

- Developing dashboards UI
- Developing Static websites
- Admin UI

SKILLS

PROJECTS

EvoRaw Nutrition (E-commerce Website)

- [click here to view](#)
- Developed a responsive e-commerce platform for bodybuilding products, like whey protein and creatine, using Next.js and Tailwind CSS for modern design and seamless user experience.
- Implemented global state management with Zustand, ensuring scalability and efficiency in handling complex application states.
- Enhanced interactivity and animations using GSAP and Framer Motion, delivering a smooth and engaging user experience.
- Integrated product filtering, category management, and secure payment gateways while optimizing performance for faster load times and a streamlined checkout process.

STNT International

- [click here to view](#).
- Developed a web application for **ST&T International** focusing on travel insurance and health services for Hajj and Umrah pilgrims, using **React**, **Redux**, and Ant Design Library for a modern and user-friendly interface.
- Implemented and integrated complex APIs for the claim form functionality, ensuring seamless data handling and an efficient user experience.
- Delivered a scalable solution supporting insurance clients in Singapore and Brunei, enhancing operational efficiency and service delivery.

POS (point of sale)

- Created responsive and visually appealing UI components to enhance the overall usability of the application.
- We use redux for state management.
- Optimized frontend code to enhance the app's loading speed and providing a faster and more responsive experience for end-users.
- Conducted testing and debugging processes to identify and resolve frontend issues, try to deliver a stable and error-free application.

Singapore Indian Association (SIA) Web Platform

- [Click here to view](#)
- Worked on the React-based web application allowing users to book sports and event facilities with dynamic pricing for members and non-members.
- Designed an intuitive date and guest selection system that displays real-time available slots for facility bookings.
- Utilized Ant Design library to create responsive, user-friendly interfaces for seamless booking and membership experiences.
- Integrated logic to differentiate pricing and benefits for members and non-members, enhancing the subscription and user engagement model.

PROJECTS

Cristofori (HRMS)

- [Click here to view](#)
- Built and integrated core modules such as Employee Management, Leave Management, Attendance, Recruitment, Appraisal, Payroll, and School Management using Angular and Ant Design library.
- Leveraged Ant Design components to create intuitive, responsive, and consistent user interfaces across all modules, enhancing user interaction and experience.
- Implemented secure, role-based authentication and authorization to restrict access to sensitive areas like payroll and administration.
- Integrated APIs for real-time data synchronization across modules, ensuring accuracy in attendance tracking, payroll processing, and leave approvals.

Dreamify (personal project)

- [Click here to view.](#)
- Designed and developed "Dreamify," an AI-powered platform enabling users to enhance image quality, expand images, remove objects, change colors, and erase backgrounds with advanced AI algorithms.
- Integrated Cloudinary API for efficient image processing and reliable manipulation, ensuring smooth functionality for end-users.
- Implemented Stripe payment gateway for secure transactions and Clerk for seamless user authentication and management.
- Gained expertise in using webhooks for real-time communication and event handling, enhancing the responsiveness of the project ecosystem.

WhatsApp Chat Viewer | Next.js, React, Tailwind CSS

- [Click here to view](#)
- Built a parser to visualize exported WhatsApp chat files in a clean UI.
- Added features like dark mode, message filtering, and responsive design.
- Used Regex to extract timestamps, sender names, and messages from text.

Travel Agency Platform

- [Click here to view](#)
- Building a dynamic trip booking platform using Next.js and MongoDB.
- Integrating Razorpay for token-based payments and seat reservations.
- Implementing Sanity CMS for real-time itinerary and price management.
- Developing a mobile-first UI with optimized 90+ Lighthouse performance.
- Creating a lead capture system for WhatsApp-based booking follow-ups.
